DISCIPLINAS PPG BIOFÍSICA - 2023-2

PERÍODO DE INSCRIÇÕES:

07/08 a 13/08

BFB 759 – IMMUNOWEBINARS - 2023.2

Docente responsável: Bruno Lourenço Diaz (bldiaz@biof.ufrj.br)

Docentes colaboradores: Christianne Bandeira de Melo / Miriam Bianchi Frontin Werneck

Carga horária: 45 horas

Início e fim das aulas: Fluxo contínuo

Horário das aulas: 2ª Feira de 12h às 15h

Limite de inscritos: Não há

Pré-requisitos: Não há

EMENTA: This course will provide students with an opportunity to discuss recent advances and interact with each other and leaders of internationally recognized immunology research groups through seminars and discussion sessions in English. Students will be exposed to different aspects of the immune response and its regulation during the presentations and will discuss with the speakers and other participants to deepen the subject and analyze the potential implications in their research projects. Each student will be required to write a summary of each lecture as part of the graded assignment. This course is part of standing collaboration between the ICB of USP and IBCCF of UFRJ. Both institutions have a long tradition in research and teaching in immunology and a history of relevant collaborations in the area. The course will focus on expanding and deepening these links.
